

GRAVITY FILLER

model 18V, 24V & 36V

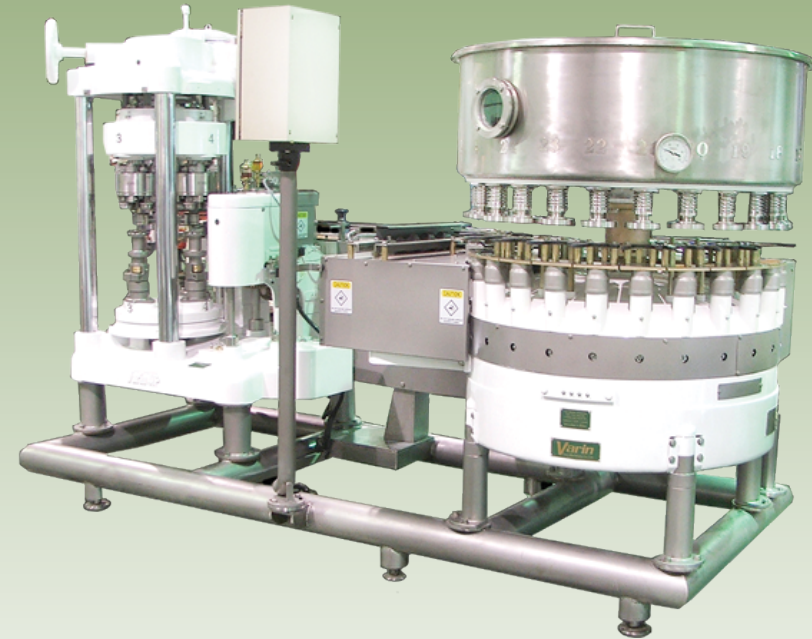

These particular models of Fillers are manufactured in our factory to provide greater in accuracy, speed, flexibility and machine life.

Smooth and accurate operation : These machines are capable of filling single strength fruit juices to an accuracy of +/-3ml. By employing a straight-line take away and direct connection drive from the closer smooth, continuous transfer of the container is ensured with spillage being virtually eliminated. Can speed up to 180 cpm. for the model 18V, up to 240 cpm. for the model 24V and up to 360 cpm. for the model 36V can be obtained depending on the product, can size and closer hook-up.

Versatile : Flexibility is inherent in the machine design. All models can be finished with change parts that permit the handling of cans ranging from No.200 (50 mm) to No.404 (105 mm) in diameter and from 2-1/8" (52 mm) to 7" (178 mm) in height. Can height changes are made simply by raising or lowering the bowl.

Heavy duty construction : Built for long life all revolving parts of these fillers ride on anti-friction bearing surfaces. These models employ non-corrosive metals on all operating mechanism and stainless steel at all areas of product contact.

Low operation and maintenance cost : The machines heavy duty base and simplified drive practically eliminate backlash. The ability to easily and quickly disassemble the filler valves permits fast and through clean-up operations. A full apron around the lower portion of the unit protect the drive system.

OPTIONS

- HOOK-UP TO SEAMER
- HOT-FILL ACCESSORIES
- STAINLESS STEEL COMMON BASE WITH SEAMER
- INSTRUMENTATION CONSOLE FOR FILL OR SEAMER CONTROLS
- DIGITAL CAN COUNTER
- VARIABLE SPEED DRIVE FOR SEAMER
